

2026

Waste Disposal Calendar

Take your waste in the designated bag to the collection area by 8:30 a.m. on the collection day.

It's against the law to leave recyclables with other waste!

Miho Village

- Each household may take up to five bags of combustible waste to the collection point each collection day.
- Tie the designated bag and place it in the designated area.

Jan	3	4	5	6	7	8	9
Feb	7	8	9	10	11	12	13
Mar	7	8	9	10	11	12	13

*There will be special collection on December 30 (Wed). *Please note that due to the New Year's holiday from January 1 to 3, the weekly collection cycle for recyclable trash will begin on the second week of the month.

Category	Example items	Disposal method
Combustible waste	<ul style="list-style-type: none"> Food waste / waste paper, etc. (Leftover food, grass, dead leaves) Cloth, leather waste (Clothing, shoes, bags) Wood, branches (Woodchips, small branches, wooden toys) Plastic products (CD cases, Disposable lighters, Hangers / buckets, etc.) Stained containers (Mayonnaise containers, etc.) 	<ul style="list-style-type: none"> Remove excess liquid from kitchen refuse. Harden excess cooking oil or soak it up with paper or cloth. Small branches must be no more than 50cm in length and 5cm in thickness and tied up in bundles when left at the collection point. However, to dispose of more than five bundles at once, please bring them to a collection center. Paper diapers must have excrement removed before disposal. Plastic products without a recycle mark, tissue paper, toilet paper, and post displaying personal information are classified as combustible waste.
Bottles, glass	<ul style="list-style-type: none"> Empty bottles (Liquor, beer, soft drink bottles) Glass (Cups, glass sheets, mirrors, fluorescent bulbs, light bulbs) 	<ul style="list-style-type: none"> Remove the caps from empty bottles and rinse them with water. (Metal and plastic caps must be disposed of separately.) Wrap broken items like glass in newspaper or something similar when disposing of them to prevent injury.
Metals	<ul style="list-style-type: none"> Empty cans (Empty cans, gas cylinders for tabletop stoves, spray cans) Small household appliances (Rice cookers, telephones, hair dryers) Metals (Saucepans, kettles, kitchen knives, umbrellas, frying pans, dry cell batteries, hot water/drink pots (including thermos flasks)) Porcelain and earthenware (Small bowls, plates, clay pots) Commonly used devices containing lithium-ion batteries, etc. (Mobile battery packs, e-cigarettes, handheld electric fans) 	<ul style="list-style-type: none"> It is dangerous to make holes in spray cans. Spray cans and gas cylinders for tabletop stoves can explode, so make sure you always use all of the gas. Wrap sharp objects like blades in newspaper or something similar when disposing of them to prevent injury. Please make sure cans are empty and rinsed with water. Small household appliances (such as mobile battery packs and e-cigarettes) with lithium batteries in them can heat up and ignite if they receive shocks, so put them out on the Metals day or in the designated small household appliance collection boxes.
Plastic containers and packages	<ul style="list-style-type: none"> Bottles Film Trays Packs, cups, etc. Caps Polystyrene 	<ul style="list-style-type: none"> Items that fit into this category are marked with . These items must be emptied, rinsed with water and then drained. When putting out PET bottles, remove the label and cap and put out only the bottle in the specified bag. Remove the cap for safety. (including PET bottle caps) Those that cannot be cleaned or that are heavily stained as well as plastic products are combustible waste.
Paper containers and cartons	<ul style="list-style-type: none"> Paper boxes Wrapping paper Paper cups Paper bags Lids Paper cartons, etc. 	<ul style="list-style-type: none"> Item that fit into this category are marked with this symbol.  Please remove anything attached to plastic waste if it is not paper. If it cannot be removed, dispose of the item as combustible waste. Products processed with aluminium (the back side will be silver colored) should be disposed of as combustible waste. Dispose of any paper product that is badly stained as combustible waste.
Newspapers, magazines, cardboard	<ul style="list-style-type: none"> Newspapers, Fliers Magazines Cardboard 	<ul style="list-style-type: none"> Dispose of by folding and putting into piles no more than 50cm in length or width and binding with string. (Newspaper and fliers may also be disposed of in paper bags from newspaper delivery shops.) Make each bundle about 30cm tall. Bundle newspapers (fliers), magazines and cardboard separately. Remove plastic book covers from books.
PET bottles	<ul style="list-style-type: none"> PET bottles that contained soft drinks, soy sauce, min, alcohol, vinegar, sauces, dressings, etc. Item that fit into this category are marked with this symbol.  	<ul style="list-style-type: none"> Dispose of lithium-ion batteries properly. Lithium-ion batteries can catch fire if they receive shocks. If they are mixed with combustible waste or recyclable waste, there is a high risk of them causing fire in the garbage collection vehicle or within the garbage incineration facility. Ensure that you either put them out on the Metals day or in the designated small household appliance collection boxes.
Oversized waste	<ul style="list-style-type: none"> Furniture, bedding Home appliances Other items 	<ul style="list-style-type: none"> Directly taking items to the waste facility (Please secure all trash before transporting it to prevent any scattering.)

- The following items are not accepted**
- Ash
 - Fire extinguishers
 - Bricks
 - New building materials (plasterboard, insulation, etc.)
 - Motorcycles, tires, car batteries
 - Polystyrene (for industrial use)
